# Company Overview

AnistonAV is a forward-thinking technology brand delivering cutting-edge Audio-Visual solutions for modern workspaces, educational institutions, public venues, and broadcast environments. With a singular focus on AV, we combine breakthrough innovation, intuitive design, and rock-solid reliability to create immersive experiences that empower communication and collaboration.

Our product portfolio under Aniston Technologies LLP includes:

- Professional Audio Solutions (mixing consoles, amplifiers, DSPs, loudspeakers)
- PTZ & IP Surveillance Cameras (turret, dome, long-range zoom with AI tracking)
- AV-Over-IP & Matrix Switching (low-latency video distribution, multiview display)
- Control & Automation (touch panels, keypads, software-driven room management)

# Mission, Vision & Core Values

## Mission

To deliver the highest quality AV equipment that enhances communication, collaboration, and creativity across industries.

## Core Values

 **Innovation:** We develop cutting-edge solutions that anticipate future needs and enhance everyday experiences.

## Vision

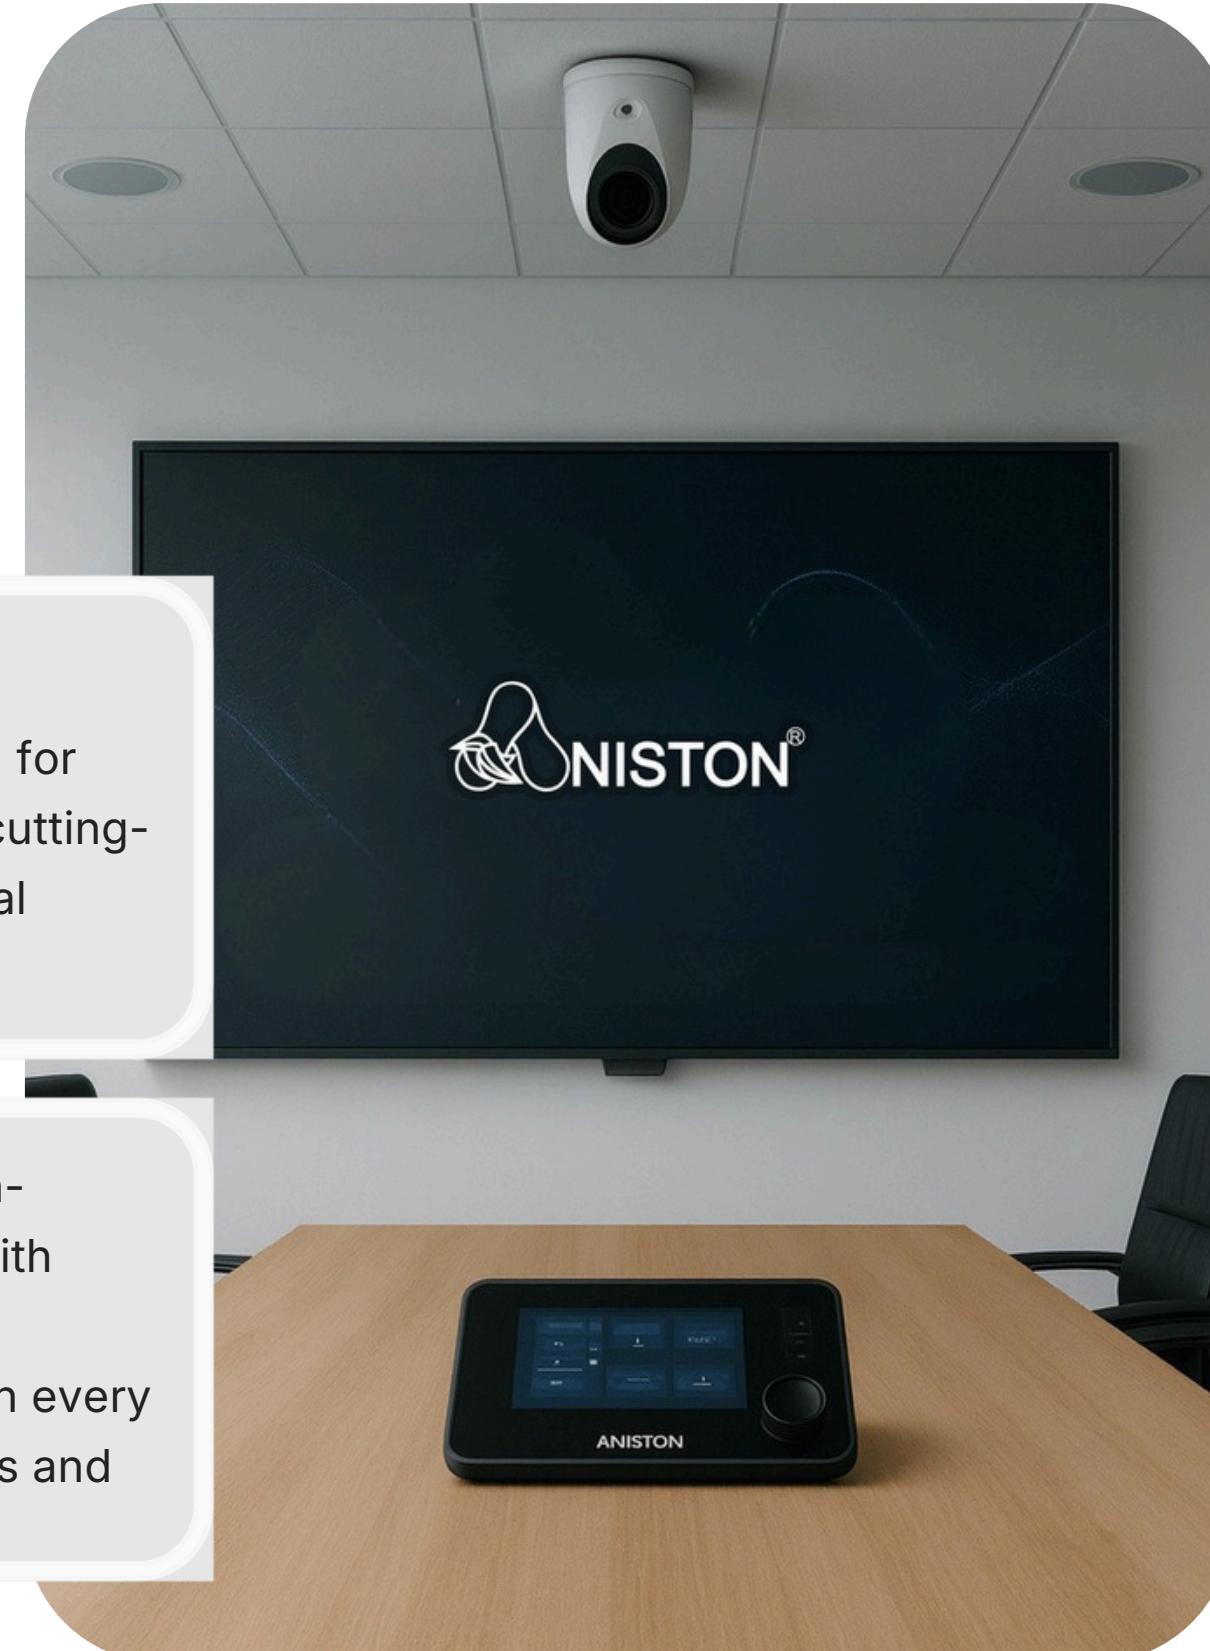

To be the preferred global brand for premium AV solutions, offering cutting-edge technology with exceptional design and performance.

**Quality:** We deliver reliable, high-performance products crafted with precision and care.

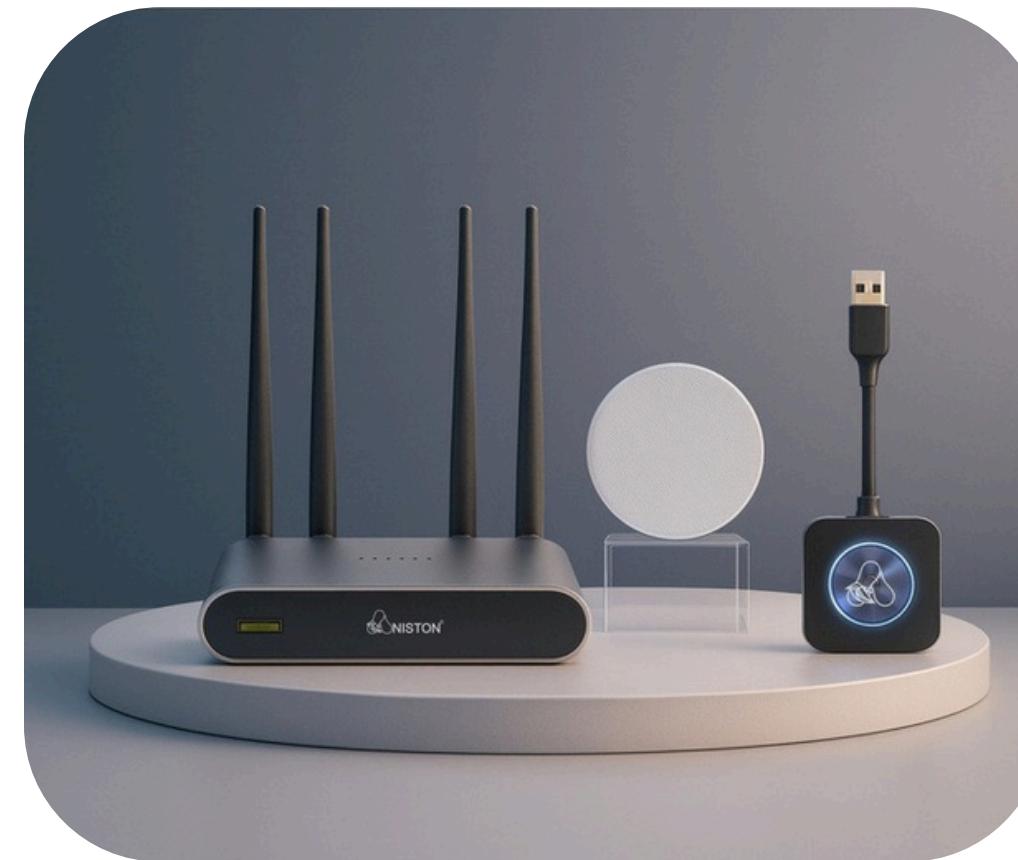

**Customer-Centricity:** We design every solution around the unique needs and experience of the customer.

# Global Design & Engineering

Engineered by Aniston—Designed in Singapore & Germany

At Aniston AV, our products combine German engineering precision with innovative Singaporean design, delivering solutions that excel in performance, reliability, and aesthetics. This fusion ensures every AV system we create is not only technically superior but also visually refined for modern environments.

# Product Categories Overview

Aniston Technologies offers a wide range of high-performance AV equipment tailored for various sectors, from conferencing to live streaming and beyond.

## PTZ Cameras

High-precision PTZ cameras with auto-tracking and 360° rotation for smart conferencing and surveillance.

## Digital Signal Processors (DSPs)

Advanced DSPs with echo cancellation and noise reduction for crystal-clear audio in professional setups.

## AV-over-IP Systems

Scalable AV-over-IP solutions for seamless audio-video transmission over standard IT networks.

## Audio Equipment

Reliable microphones, speakers, and amplifiers engineered for consistent, high-quality sound delivery.

# Transparent Touch OLED Display

## AN-200W-55IG 55-Inch AI Transparent Navigator

**Overview:** A 55-inch transparent AI-powered navigation and display system designed for malls, museums, airports, and corporate experience centers. Combines transparent OLED visuals, autonomous mobility, and AI interaction

### Key Features:

- Transparent OLED Display
- AI Autonomous Navigation
- Interactive AI Assistant
- Digital Human / Hologram Display
- 4K Camera & Microphone Array
- High-Performance Processing
- Mobile Battery Operation
- Multi-Network Connectivity

## AN-60A-21PT Transparent Multi-Language Translator Display

**Overview:** The AN-60A-21PT is a 20.8-inch transparent smart translator display designed for multilingual customer-interaction spaces. With real-time AI translation.

### Key Features:

- Transparent OLED Panel
- Real-Time Multi-Language Translation
- Dual-Side Bilingual Display
- PCAP Multi-Touch Interface
- Integrated Android System
- Built-In Speakers & Microphone
- AI Voice Recognition Support
- Wi-Fi, LAN, HDMI & USB Connectivity

## AN-600A-77HM 77-Inch Transparent Floor Standing OLED Kiosk

**Overview:** The AN-600A-77HM is a premium 77-inch transparent OLED kiosk designed for high-end retail, museums, corporate galleries, and mixed-reality experience zones. With its 45% transparency.

### Key Features:

- Premium Transparent OLED Panel
- Immersive Holographic Visual Effects
- 4K UHD Visual Quality
- Touch & AI Interaction (Optional)
- Smart Media System
- Multiple Connectivity Options
- Strong Commercial Build
- Flexible Installation Modes

## AN-90MT-55D 55Inch OLED Module Transparent Display

**Overview:** The AN-90MT-55D is a 55 inch A high-performance transparent OLED display that delivers floating digital visuals with exceptional clarity, contrast, and transparency.

### Key Features:

- 55" Full HD Transparent OLED Panel (1920 × 1080)
- ~43% Transparency with Self-Emissive OLED Pixels
- Ultra-High Contrast and Wide Viewing Angles
- Slim Aluminum Frame with Tempered Glass Protection

# PTZ Cameras

## MCP-20U MeetCam Pro

**Overview:** A high-definition PTZ camera designed for video conferencing, education, and live streaming, equipped with AI-powered auto-tracking.

### Key Features:

- AI Auto-Tracking
- Dual Lens System (48° and 107°)
- Multiple Output Options (PoE+, HDMI, SDI, USB/IP)
- Low-Light Performance
- Onboard Microphone
- Technical Specifications:
  - Resolution: 1080p/4K
  - Zoom: 12x Optical Zoom
  - Outputs: HDMI, SDI, USB, IP

## MCP-25U MeetCam Pro

**Overview:** A 4K Ultra HD PTZ camera with auto-tracking and AI framing, designed for professional conferencing and hybrid meeting environments.

### Key Features:

- 4K Ultra HD Resolution
- PTZ (Pan-Tilt-Zoom)
- Functionality Auto-Tracking
- Technology AI-Based Auto
- Framing Wide-Angle Lens
- Multiple Video Output Options (USB/HDMI/LAN)
- Low-Light Performance
- Network & Web UI
- Control Built-in Mounting
- Flexibility Seamless Audio Integration

## DualSight Edu Pro 50E

**Overview:** An ext-generation dual-camera AI classroom system designed for hybrid education, lecture capture, and intelligent auto-tracking.

### Key Features:

- AI Auto-Tracking & Framing
- Dual-Camera Teacher & Student System
- Dual-Lens PTZ + Panoramic Design
- Role-Based Field of View (48° / 107°)
- Gesture Recognition Control
- Full HD 1080p60 / 4K30 Output
- 20x Optical + 16x Digital Zoom

## DualSight Ultra Pro 50U

**Overview:** A dual-lens 4K PTZ camera designed for speaker tracking and room-wide coverage, perfect for high-end hybrid conferencing and smart classrooms.

### Key Features:

- Dual-Lens Design (Wide + Telephoto)
- 4K Ultra HD Resolution
- Intelligent Speaker Tracking
- Auto-Framing with AI Detection
- Seamless View Switching
- Wide Coverage Angle
- USB & Network Video Output
- Low-Light Image Optimization
- Remote Control via IP & RS232
- Flexible Mounting Options

# Digital Signal Processors (DSPs)

## Symmetrix AI16 DAN16

**Overview:** A powerful 16x16 analog DSP with Dante support, designed for professional audio management in corporate, live event, and broadcast environments.

### Key Features:

- 16x16 Analog I/O
- Dante Integration for flexible routing
- AI-Powered Audio Processing
- Remote Control via Web Interface
- Technical Specifications:
  - I/O: 16 Analog Inputs / 16 Analog Outputs
  - Connectivity: Dante + Ethernet Control

## Symmetrix DAP1616 DAN64

**Overview:** A 16x16 professional digital audio processor with 64x64 Dante support, ideal for large-scale AV installations requiring advanced audio routing and processing.

### Key Features:

- 16x16 Analog I/O
- 64x64 Dante Audio Channels
- Advanced Signal Processing
- Echo & Noise Cancellation
- Audio Matrix Mixing
- USB Audio Interface
- Preset Scheduling & Scene Recall

## Cadence AI 16x16

**Overview:** A smart 16x16 digital audio processor with AI-powered echo cancellation and noise reduction for premium conferencing environments.

### Key Features:

- 16x16 Analog Audio I/O
- AI-Enhanced Acoustic Echo Cancellation
- Real-Time Noise Suppression
- Auto Gain Control (AGC)
- Built-in Feedback Elimination
- Flexible Routing Matrix
- Web & IP Control Interface

## Cadence AI 8x8

**Overview:** Compact 8x8 audio DSP with intelligent audio processing, ideal for small to mid-sized meeting rooms and hybrid spaces.

### Key Features:

- 8x8 Analog Audio I/O
- AI-Based Echo & Noise Cancellation
- Auto Mixer & AGC Built-in USB
- Audio Support Feedback
- Suppression Scene Recall & Presets
- Web UI Configuration

# Dante Amplifier & Ceiling Speaker & Microphone

## AN-MR218W Ceiling Speaker

**Overview:** A premium integrated ceiling speaker with built-in amplifier, designed for elegant installations and clear, balanced audio performance in classrooms, meeting spaces, and commercial environments.

### Key Features:

- Integrated Amplifier Design
- Slim and Elegant Appearance
- Wide Frequency Range
- High SPL Output
- Multiple Input Options
- Plug-and-Play USB Playback
- Flexible Power Input

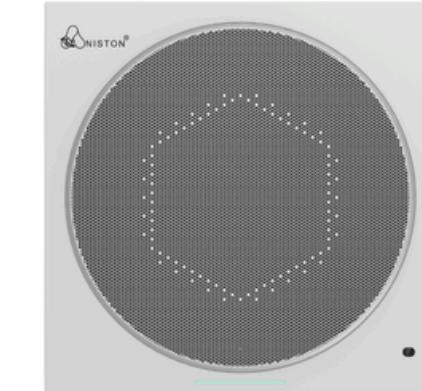

## AeroTone Dante PoE Ceiling Speaker

**Overview:** Network-powered Dante ceiling speaker delivering clean, consistent audio ideal for corporate, education, and smart building installations.

### Key Features:

- Dante Audio over IP
- PoE+ Powered
- Integrated Amplifier
- Wide Dispersion Coverage
- Low-Profile Design
- Plug-and-Play Network Setup
- High Speech Intelligibility

## arrayX AX-CM360 Ceiling Array Microphone

**Overview:** A premium ceiling-mounted microphone with 128-element beamforming and AI-powered voice enhancement, designed for crystal-clear speech pickup in modern meeting and learning environments.

### Key Features:

- 128-Element Beamforming Array
- AI-Powered Voice Enhancement
- 360° Spatial Coverage
- AI-AFC Feedback Cancellation
- Dante + Analog Connectivity
- Camera Tracking Integration
- Ultra-Low Latency Performance

## Sonorix 1504 DSP+D Dante Network DSP Amplifier

**Overview:** High-power 4-channel Dante amplifier with advanced DSP and flexible integration for large AV and PA systems.

### Key Features:

- 4x150W High Power Output
- Integrated DSP with Filters & Limiters
- Dante Network Audio Input
- Web UI for Configuration
- Thermal & Overload Protection
- Energy-Saving Mode
- Rack-Mount Ready

# Directional, Art & Invisible Speakers

## Aniston IL70 Invisible Speaker

**Overview:** A fully concealed architectural speaker engineered to deliver room-filling, high-fidelity sound while remaining completely invisible within walls and ceilings.

### Key Features:

- Completely Hidden In-Wall / Ceiling Installation
- Ultra-Slim 35 mm Architectural Depth
- 180° Wide Sound Dispersion Technology
- High Sensitivity (94 dB) for Efficient Audio Output
- Paintable & Finish-Friendly Surface (up to 2 mm).

## AN-MX215W Directional Speaker

**Overview:** The AN-MX215W (Model X2) is Aniston's most advanced directional speaker, engineered with an integrated amplifier and cutting-edge audio algorithms.

### Key Features:

- Dual-Channel Stereo Output
- Integrated Amplifier Design
- Advanced Audio Algorithms
- High Directivity Beam Control
- Wide Frequency Range
- Multi-Input Support (AUX / Bluetooth / Type-C)
- Compact & Lightweight Housing

## AN-CU151 Directional Speaker

**Overview:** The AN-CU151 is a next-generation directional speaker engineered for flexibility, easy integration, and seamless aesthetics—making it ideal for modern interactive installations and high-precision audio zones.

### Key Features:

- Modular & Expandable
- VESA-Compatible Mounting
- Engineered for Easy Installation
- Flat. Thin. Elegant.
- Ultra-Focused Sound Projection
- Minimal Distortion Output
- Optimized for Interactive Spaces
- Seamless Architectural Integration

## AN-S4BAD3 Art Sonic

**Overview:** AN-S4BAD3 is a premium Art Sonic Speaker that blends interior decor with immersive audio. Designed as a wall-mountable art piece, it delivers high-quality wireless sound while enhancing modern living rooms, cafés, studios, and creative spaces.

### Key Features:

- Art-Integrated Speaker Design
- High-Fidelity Bluetooth Audio
- Seamless Wall-Mount Installation
- Slim, Lightweight Mural Form
- Factor
- Wireless Music Playback
- Built-In Amplifier System
- Wide Compatibility (Bluetooth Devices)

# Extender & Wireless Presentation Device

## StrixLink USB 100 USB C Extender

**Overview:** StrixLink USB-100 is a next-generation professional USB 3.2 Gen 1 extender designed to meet the demanding requirements of modern AV, conferencing.

### Key Features:

- Ultra-Long Distance up to 100m
- High-Speed Performance
- Universal Compatibility
- Multi-Port Connectivity
- Bi-Directional 24V PoC
- Robust Industrial Design
- Plug-and-Play Operation

## HBX-4K70 Pro HDBaseT Extender Set

**Overview:** A high-performance HDBaseT extender set enabling 4K video, audio, and control transmission up to 70 meters over a single CAT6 cable.

### Key Features:

- 4K @ 60Hz UHD Support
- 70m Transmission via CAT6
- HDMI Loop-Out on Transmitter
- IR & RS232 Passthrough
- HDCP 2.2 Compliance
- Plug-and-Play Installation
- Compact Form Factor

## StrixLink ARC 100 HDMI Extender ARC

**Overview:** StrixLink ARC-100 is a high-performance, next-generation HDMI over HDBaseT extender engineered for professional AV deployments.

### Key Features:

- 4K@100m, 1080p@90m
- Uncompressed 4K60 UHD Video
- 18Gbps Bandwidth Support
- ARC (Audio Return Channel)
- Bi-Directional IR Control
- IPoC (Power over Cable)
- Professional Audio Support

## TapShare TS-1600 — Wireless Presentation System

**Overview:** TapShare TS-1600 is a professional wireless presentation and collaboration system designed for modern boardrooms, hybrid classrooms, conference halls, and enterprise meeting spaces

### Key Features:

- Plug-and-Play Wireless Collaboration
- 4K Ultra HD HDMI Output
- Dual Wireless Transmitters Included (USB/HDMI/Type-C)
- 9-Way Split-Screen Sharing
- High-Density Wi-Fi 6 Streaming (3x3 MIMO)

# Key Features of Our Solutions

**Innovative Features of Aniston AV Products.**

## AI Integration

Smart auto-tracking and audio optimization powered by AI for enhanced conferencing and classroom experiences.

## Flexibility

Supports multiple connectivity formats like HDMI, USB, Dante, and IP for seamless system integration.

## Scalability

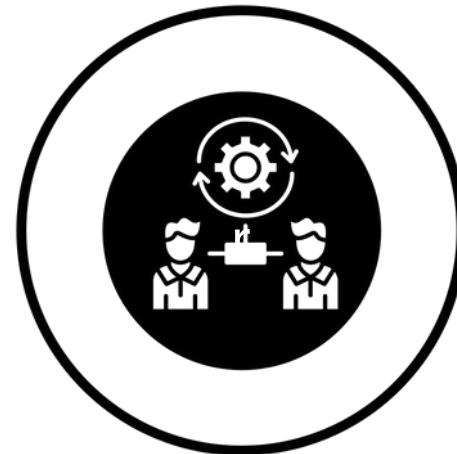

Easily adapts from small meeting rooms to large-scale installations with modular, network-ready designs.

## Reliability

Engineered with high-quality components to ensure stable, long-lasting performance in all environments.

# Empower Your Success at Aniston

Tailored on boarding, on going coaching, and best-in-class sales resources to help you win from day one.

## Structured Onboarding Roadmap

From Day 1 immersion workshops to hands-on product demos and role-plays, get everything you need—step by step—to start selling with confidence.

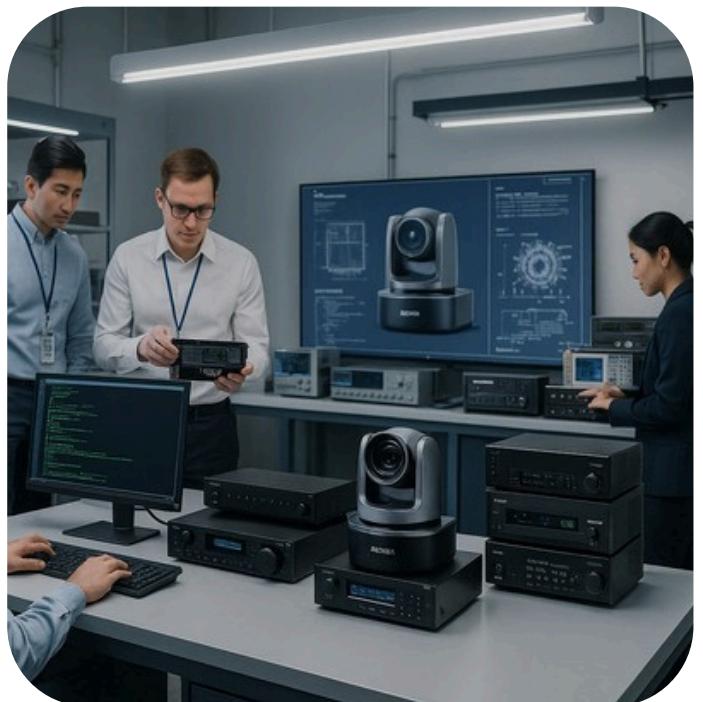

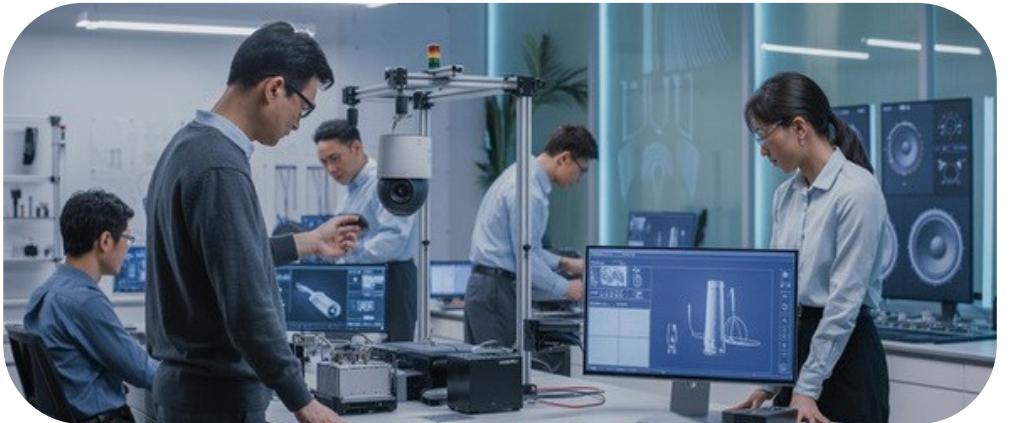

## Sales Playbook & Winning Tools

Access playbooks, objection-handling guides, pricing calculators and interactive demos—all curated by our top performers—to close deals faster and smarter.

## Dedicated Field Coaching

Tap into one-on-one mentoring, live deal clinics, and regular performance reviews with senior sales leaders who are invested in your quota-crushing success.

# Continuous Innovation in AV Products

Aniston Technologies is driven by continuous research and development, ensuring we stay ahead in delivering the most innovative AV solutions for the modern world.

## In-House R&D

Our in-house engineering team drives product innovation through focused research, testing, and development.

## Global Design Philosophy

We blend German precision with Singaporean design to deliver AV products that are both smart and elegant.

# Why Choose Aniston Technologies?

Aniston Technologies is committed to providing world-class AV solutions. Here's why our customers choose us:

## Cutting-Edge Technology

We use the latest tech to offer innovative, future-proof solutions.

## Global Presence

Our products are trusted worldwide in a variety of industries.

## Customer-Centric Approach

We provide tailored support and customized solutions to meet each client's unique needs.

# Product Support & Services

## Comprehensive After-Sales Support

Aniston Technologies offers unparalleled customer support and maintenance services to ensure your products perform optimally throughout their lifecycle.

### 24/7 Support

Our support team is available around the clock via phone, email, and online platforms to resolve any issues promptly.

### Training

We provide hands-on training sessions to ensure clients fully understand and maximize the use of our products.

### Warranty & Maintenance

Our products come with strong warranty coverage and optional maintenance plans to ensure long-term performance and peace of mind.
